### How to add up overall points without a calculator:

Assuming that you evaluate a speech with "Good" as a standard mark, you can simply add or subtract points from Style (28), Content (28) and Strategy (14), equaling an overall score above or below (70).

We usually never exceed +5 /-5 per category. But this is to your discretion.

Counting the points added or taken off per category equal the total deviation from 70.

Example:

	Style	Content	Strategy	
Deviation > 28/14	+1.5		+0.5	total deviation from 70: +1.5-0.5+0.5= <u>+1.5</u> <b>=71.5</b>
points given	29.5	27.5	14.5	
Deviation < 28/14		-0.5		

This is just a piece of advice. You may use any strategy most familiar to you.
